Subject: RE: Wildlife Exposure to Rodenticides Questions
Date: Wednesday, July 17, 2013 8:28:00 AM

Good morning Rusty,

I'm happy to help out although we don't see many known clinical anticoagulant rodenticide cases at our hospital. That said, we only test suspect cases. I'm out of the office the week of July 29th (Wildlife Disease Association Conference) but am happy to chat before or afterwards. Do you have any alternative dates in mind?

Dave

Subject: Wildlife Exposure to Rodenticides Questions

Good Afternoon Dr. McRuer,

Maureen Murray, of the Tufts School of Veterinary Medicine, gave me your name as a potential contact for wildlife rehabilitation.

I am involved in EPA's efforts to remove second generation anticoagulant rodenticides from the residential consumer market and am interested in learning more about your experience rehabilitating wildlife exposed to rodenticides. Can either you be available the week of July 29 for a short conference call to discuss your experience? If the answer is yes, I can provide more specific questions we would like to discuss in advance of our call.

I greatly appreciate your time and consideration.

Regards,

Rusty
